Spider Wikipedia

February 15th, 2019 - Like other arthropods spiders are coelomates in which the coelom is reduced to small areas round the reproductive and excretory systems Its place is largely taken by a hemocoel a cavity that runs most of the length of the body and through which blood flows The heart is a tube in the upper part of the body with a few ostia that act as non return valves allowing blood to enter the heart

Agelenidae Wikipedia

February 12th, 2019 - The Agelenidae are a large family of spiders in the suborder Araneomorphae Well known examples include the common grass spiders of the genus Agelenopsis Nearly all Agelenidae are harmless to humans but the bite of the hobo spider *Eratigena agrestis* may be medically significant and some evidence suggests it might cause necrotic lesions However the matter remains subject to debate
